3 OTP Corporation

Main Products

Plastic tubing for hydraulic and pneumatic piping

● Plastic tubing Our coiled tubing is widely used for facilities and equipment piping, and can be manufactured from a single piece according to the customer's plan. Our coiled tubing is manufactured from scratch according to the customer's plan. We can also print on the tubing to differentiate it from the competition. We also produce and sell spiral tubes and slit tubes for protective bundling of wiring, etc. These products can also be used in the industrial equipment and automobile industries. EX slit tubes can be used to protect and bind small-diameter products such as optical cables. The EX Slit Tube is specialized for the protection and bundling of small-diameter products such as optical cables, and we have registered its design in Japan and China.

I want to receive an order.

1 Arshan Industries, Ltd.

Main Products Aluminum fabricated products

● We have developed and produced aluminum fabrication and heat sinks, heat case series combining heat dissipating fins and cases, electrical components utilizing the advantages of aluminum extrusion, tower antenna parts, structural components, and medical equipment parts. Our strength lies in sheet metal processing, which includes various cutting processes using water-jet cutting machines and other processes from CAD/CAM to punching, bending, and welding with a turret punch. We are also working on the improvement of processing technology and possibilities by incorporating new equipment. The production of a foot-operated disinfection table is one of our new initiatives.

Metal processing
Industry

8 Fuweta Industrial Co., Ltd.

Main Products

Aluminum extrusion mold material cutting and manufacturing of stainless steel telescopic cover

- We are a company that cuts, packs, and stores aluminum extrusion molds and long scrap products as casting materials. Aluminum scrap generated at customer sites is sorted and cut by alloy, and processed again as a casting raw material that can be safely and efficiently performed in the casting process. By accepting and delivering scrap on our own flights, we are trying to "deliver just-in-time without burdening customers". In addition, we have a partnership with a manufacturer of telescopic covers used in machining centers, etc., and we also produce telescopic covers using precision sheet metal.

I want to receive an order.

5 Kawai Optical Co.

Main Products

Mirrors/filters in electromagnetic waves from 0.2 to 25 μm

- We are a coating manufacturer using vacuum deposition and sputtering.
- Based on our many years of experience in optical thin films, various functional thin films, decorative coatings, etc., we are able to propose the most suitable coating for our customers.
- The coating ensures that the light (laser light, infrared, UV light, etc.) It is possible to increase the utilization efficiency and select the necessary light and take it out. It is used in various fields such as the medical industry, the automobile industry, and semiconductor-related industries.
